# EQUELLA 6.3 QA4 release

Pearson has recently released EQUELLA 6.3 QA4. This release includes all the features and fixes that were provided in the 6.3 QA3 release plus additional issue fixes. We recommend upgrading your test environment to this version for testing prior to deployment in your production environment.

## Resolved issues

The following issues have been resolved in this release since EQUELLA 6.3 QA3. This list contains issues that were reported by clients, and those found by our quality assurance team.

### API

- The generated documentation at [http://\[your-institution\]/apidocs.do](http://[your-institution]/apidocs.do) incorrectly showed a field called "exportDetails" which should have been "\_export" on the `/usermanagement/local/user/{uuid}` endpoint.
- When creating a new item the rating field was ignored.

### Copyright

- If a user was granted AUTO\_CREATE\_COURSE permission at any level, including on a specific resource, the course auto creation would function on any resource.

### Integration

- Links to resource summaries added to Blackboard with an older Building Block would not be able to be viewed with a new Building Block due to an error.
- Launching resources added to Blackboard with an older Building Block would fail if the title of the resource contained an "&" character.

### General

- Users would receive a warning when trying to launch an administration console that the certificate used to sign the application had expired. Users were prevented from the starting the application without adding an exception in the Java settings.

## Known issues

- The Office to HTML conversion service is not compatible with 64-bit architecture based servers and should be disabled on these machines via settings in `/path/to/equilla/learningedge-config/optional-config.properties`.

- Google Chrome and Safari running on Apple OS X do not allow users to drag and drop files onto the File Manager applet. The File Manager applet provides an action on the toolbar to select and upload files.

## Supported environments

Supported environments information for EQUELLA 6.3 QA4 can be found at <https://neoconnect.pearson.com/docs/DOC-22438>
